<b>1117</b>	<b>Additional Comments:</b>
<b>Response #1</b>	Explanations to questions were not always clear or helpful.
<b>Response #2</b>	PK was great
<b>Response #3</b>	PK makes calculus fun and always takes time to emphasize difficult concepts. It's not easy covering so much material when we only meet once a week, but he posts supplemental review/practice materials to facilitate learning outside classes. He also makes it clear that he wants us to succeed and that he believes in us.
<b>Response #4</b>	no additional comments
<b>Response #5</b>	the teacher, PK, was so nice and helpful we learning content in class. however, the web assigns we were given as homework were extremely more difficult and complicated than the content we learned on the video quizzes. this made learning complicated problems difficult to do on my own and was discouraging. this made me unprepared for exams where we would find these difficult problems. also the fact that a math course is hybrid with only 1 hour and a half lecture a week is 100% not enough. no math course should be hybrid as it makes learning content extremely more difficult, especially for those who struggle with math.
<b>Response #6</b>	N/A

<b>Response #7</b>	I thought this class was well taught and the revision materials provided were very effective. The materials properly prepared me for exams, and I was able to succeed with the professor's clear advice.
<b>Response #8</b>	He was amazing and had such a kind heart! He wanted all of his student to do well!
<b>Response #9</b>	PK was very helpful this year!
<b>Response #10</b>	Would often give out the wrong information or confusing information when not needed. Not the best at explaining things or remaining consistent. Nice person though.
<b>Response #11</b>	pk is great
<b>Response #12</b>	I did audit this class because I was struggling, however Professor PK is very good and will help you whenever you need help!
<b>Response #13</b>	Prof PK is a very nice professor who teaches in a very good way and explain all the problems nicely
<b>Response #14</b>	The teacher was very passionate about the subject.
<b>Response #15</b>	N/A
<b>Response #16</b>	none
<b>Response #17</b>	PK was very kind and understanding that the topics were difficult to understand. He showed up to class with a passion for math and teaching math.
<b>Response #18</b>	Funny and enthusiastic teacher!
<b>Response #19</b>	n/a
<b>Response #20</b>	very cool guy, big fan
<b>Response #21</b>	even though we only had class in person once a week, PK made sure to spend a lot of time on material and taught us a lot without wasting any time in class
<b>Response #22</b>	My experience was he was impatient and condescending when I did not understand a topic and would sometimes not explain things thoroughly because he thought i should've already known the certain topics. I felt like he was laughing at me like I was stupid or inferior. If I did not understand something he said, he was extremely short with me and thought I should know what he said.
<b>Response #23</b>	He was a very fair and good professor
<b>Response #24</b>	He was always available after class to explain problems to me.
<b>Response #25</b>	Very kind teacher! PK is the best!!!
<b>Response #26</b>	Great professor, always happy to help. Perhaps he could be better at explaining some of the material but overall good professor.
<b>Response #27</b>	PK was very understanding and always made an effort to check in.
<b>Response #28</b>	The instructor was great. he really listened to the students and went over everything
<b>Response #29</b>	I liked that your lowest quiz grade is replaced by the highest quiz grade. This relieved a little bit of stress from the beginning of the semester, but also motivated me to work hard.

<b>Response #30</b>	N/A
<b>Response #31</b>	subject knowledge, communication skills, enthusiasm, and professionalism.
<b>Response #32</b>	None
<b>Response #33</b>	N/A
<b>Response #34</b>	n
<b>Response #35</b>	His accent was hard to understand, but overall a very good instructor
<b>Response #36</b>	N/A
<b>Response #37</b>	He is a good teacher, we just didn't have a lot of time of in-person instruction.
<b>Response #38</b>	Instructor was very good and explained this well
<b>Response #39</b>	PK was awesome and really wants to see his students do well.
<b>Response #40</b>	You have to go to each class and watch every video for better understanding material in mid-terms and quizzes
<b>Response #41</b>	Good instructor, I learned a lot but mostly through the online materials provided by the school. He helped us prepare for exams but often made us feel bad if we didn't know something or if we got a little behind. I was always frustrated going to his office hours because he would often ask why I didn't know something. The point of office hours to get help on a subject that students may feel weak in, so there's no point to make us feel bad for reaching out for extra help. He also made me feel bad about not knowing something one time, and then proceeded to do the problem wrong and say he was right, I had the answer key to the problem in front of me.

<b>Response #4</b>	no additional comment
<b>Response #5</b>	it was very hard to retain information and learn actual topics in this class. i wa sonly able to understand and recognize patterns that we would see in problems to complete them, not using actual knowledge of mathematics. the notecards are what saved me in the class.
<b>Response #6</b>	N/A
<b>Response #7</b>	I don't have any additional comments
<b>Response #8</b>	N/A
<b>Response #9</b>	Class content was challenging but do able.

<b>Response #12</b>	This class is one of the hardest math classes I have ever taken. Professor PK does try his best to make sure all of his students succeed. I ended up auditing the class, it was just too hard for me and added a lot of stress, however auditing did help me understand the information better for when I retake the course:)
<b>Response #13</b>	No comments
<b>Response #14</b>	The class was clear but the half online part made it much harder.
<b>Response #15</b>	N/A
<b>Response #16</b>	I enjoy doing math but this class was set up very poorly. Meeting only once a week does not give enough time for the instructor to go over all the materials that are suppose to be covered in this course.
<b>Response #17</b>	This course was more difficult and confusing because of the hybrid format. It didn't allow professors to teach based on what students didn't understand and what would be on their tests. The online material was not very in-depth and didn't give a comprehensive teaching of the calculus concepts for the course. The in-person and online learning was disconnected and was not logically organized. Despite teacher's best effort the course structure made this course more difficult than the math concepts themselves.
<b>Response #18</b>	Greatly enjoyed this class!
<b>Response #19</b>	n/a
<b>Response #20</b>	Took this class in High School.
<b>Response #21</b>	the course was easy to follow and the grading policy is very nice and allows a lot of leeway for grades
<b>Response #22</b>	N/A.
<b>Response #23</b>	I had a great time throughout the semester in this class
<b>Response #24</b>	It would be helpful if there were more than 5 attempts per question on the homework.
<b>Response #25</b>	Overall good class and great teacher. He was very thorough when we were in person, I just wish we had more classes in person since I work better that way.
<b>Response #26</b>	The Kent Hall math help was very beneficial
<b>Response #27</b>	I wish it wasnt hybrid. I learn better being in person so having the lectures be online was challenging for me.
<b>Response #28</b>	I think that as someone who took calculus in high school, this was a good/easier course for me, but for those who have no prior knowledge in calculus, I can understand how learning from videos may be challenging.
<b>Response #29</b>	N/A
<b>Response #30</b>	the class was fun! i fell lucky to have PK as my professor.

<b>Response #34</b>	Math has never been my strong suit
<b>Response #35</b>	Thank you for taking time to teach this class, I really enjoyed it!
<b>Response #36</b>	Enjoyed the class and teacher
<b>Response #37</b>	One of the best professors I've had so far at UD and really made his classes very fun and engaging. PK wanted each and every student to do well and hated to see us struggle.
<b>Response #38</b>	It depends about what math we are talking about, this course was hard for me, even programming and physics is easier.
<b>Response #39</b>	The math course pack was very helpful for learning the material.
<b>Response #40</b>	I personally am not a big fan of math, but Prof. Kataboh was very engaging and entertaining in his lessons which made learning calculus a little better.
