	Response #1 This professor does a good job at explaining things for students. Quizzes are easy enough and are made to represent what we learned in class. There has never been any surprises when taking a quiz. However, the first test was a bit hard, and I feel that some of the questions were worded in ways that we have not gone over before. The second test was definitely more recognizable though.

Questions	
QID	Question
1116	Additional comments:
Response #1	I do not love math but this course made it very possible for me to be successful.
Response #2	This is my third time taking this class. I meet with a tutor every day and do hours of practice, but for some reason have a hard time grasping these concepts. I am hoping that with the homeworks being put in and some curving that I will pass the class.
Response #3	Professor was understanding of the students.
Response #4	N/A

	Response #5	None
	Response #6	none
	Response #7	N/A
	Response #8	Although this is my second time taking calculus, this time around it was much easier to follow the coursework and lectures.
	Response #9	N/A
	Response #10	I am now feeling more confident in my mathematical skills.
25462	Please comment on the course strengths and/or any improvements you might recommend.	
	Response #1	This course has great opportunity for student/teacher engagement. Lot's of assignments to work and practice. I do wish lectures were recorded but notes are always available and meeting with PK is really easy.
	Response #2	PK is very smart and seems to love teaching which is great. I feel as if I am struggling because Calc is not really something that I am good at. I recommend maybe more study sessions and maybe practice exams.
	Response #3	Homework was straight forward, professor was always ready to help you if you needed it.
	Response #4	Everything was great.
	Response #5	The instructor's skillful knowledge and positive attitude he brings to the course.
	Response #6	None
	Response #7	I have no comments
	Response #8	It might be good if there was more ways to communicate with other classmates. Studying with peers may help to get a different understanding of the content and since the chat on zoom was only directly to the professor, we couldn't communicate with classmates.
	Response #9	I do feel as though despite being online and during a shortened session, I was able to follow along with the course and do feel as though my knowledge is the same as if I were to have taken this course during a regular session.
	Response #10	The course is very fair and if a student applies themselves, they will do well.
	Response #11	I would give students an extra week or even a little more time so the course work isn't as condensed
